

Assignment: 13

Problem Statement:-Create a work mail for your organization.

Step1:.Login into AWS and search Amazon WorkMail then click on organizations then click on create organization select free test domain and give alias name. click on create organization, organization ID and default domain is created.

Create an Amazon WorkMail organization
Create an Amazon WorkMail organization to provide email addresses to groups of users in your company. The email addresses include the domains that you select for your organization.

Organization settings

Email domain [Info](#)
Select the domain to use for email addresses in your organization.

- ☐ Existing Route 53 domain
Select a domain name that you manage with a Route 53 hosted zone.
- ☐ New Route 53 domain
Register a new Route 53 domain name to use with Amazon WorkMail.
- ☐ External domain
Enter a domain name that you manage with an external DNS provider.
- ☒ Free test domain
Use a free testing domain provided by Amazon WorkMail. You can add a domain later.

Alias [Info](#)
Enter the alias to use for your organization.

riyamaill

Your alias can have up to 45 characters. Aliases can only include lowercase letters (a-z), numbers (0-9), and dashes (-). This determines the login URL for the web application: riyamaill.awsapps.com/nc1.
